What's New in the?

With a variety of specific features, ImageRanger is exactly the tool for your picture finding and organizing needs. It is a tool with a lot of functionality, and a very simple operation interface, but it also comes packed with a ton of options. The most used Windows mobile operating system is the latest iOS. The apps developed on such platform, often called "iOS apps" are the most popular among the smartphone users of all age groups. They are less costly, mostly have a large number of downloads and are the ones, which stay with the users for a longer time. The accessibility of such apps, especially the free ones is what attracts most of the people to download them. In the latest version of iOS 10, the users get to enjoy the improved and best ones among the apps with the help of the drag and drop facility. Let's find out how to download such apps, for the iPhone users. iOS 10 Feature Summary The drag and drop feature The drag and drop capability has been made available as a feature of the latest iOS version. The tool will help you easily import and remove apps from the device that you have already downloaded. The drag and drop feature will be shown on the Apps tab of the device's Settings menu, as soon as you connect the phone to the Mac or PC. You just have to select the app you want to move and simply click on the Drag icon from below the screen. The icon will lead you to the app icon, which you want to move. You have to perform the same action again to remove the app. Drag and Drop App The new feature is available on the iOS app. If you have downloaded any app from the App Store, you will be able to drag the app file to the Desktop or Windows Explorer folder to save it on your PC. You just have to drag the app file to the window pane, open or create a folder and select a file path to get it placed on the computer. Apps Search for the iOS 10 Feature The drag and drop feature makes it possible for the iOS users to search and download the most appropriate ones from the App Store. If you have downloaded more than one app on the phone, then the search capability would help you in searching and finding the one which is best suitable for your needs. The search would be performed from the Apps tab of the device's Settings menu. The search could be cancelled by pressing the button on the search bar. The search bar or search field will help
