Developed by the same team that brought you X Rebirth, X Rebirth: Rhapsody and Imperium Galactica: Birth of the Warriors. X Rebirth: Rhapsody brings this Sci-Fi game genre to a brand new level of greatness, meaning more polished mechanics and a bigger approach. There are many new features with X Rebirth: Rhapsody, namely: - Real-time space combat - 3D planets - A brand new NPC character - New ways to play and challenges - 4 military upgrades: Defensive Shield, Forward Turret, Cannon Control and Shields for All is not enough of an upgrade. - Full Voxel Shader - Steamworks integration (unlike X Rebirth: Rhapsody, X Rebirth: Rhapsody: is a binary executable so the Steam version is not possible) - Steam achievements - Binary version of the game - A huge living ship with a full 3D cockpit for the pilot. "X Rebirth: Rhapsody" was released in August 2013 in the Czech Republic and on September 16, 2013 in Europe and the rest of the world. In X Rebirth: Rhapsody, this innovative setting is being transferred to new gameplay mechanics such as character abilities, alien (NPC) characters, new spacecraft and the planet models that feature them. All of these elements will contribute to the creation of a highly immersive universe. Highlights of X Rebirth: Rhapsody: - 15 multiple choices (and more!) for your character at birth - More than 50 unique planets to explore and colonize - The toolbox for land owners: upgrading the farms, stables and mines - 3D NPCs - New enemy factions, aliens and NPC characters - Extended Space Combat mechanics: The ability to jump to stars, see ships on hyperspace while in space, chase and engage enemies, contribute to the ongoing war, etc. - 4 Military Upgrades: Defensive Shield, Forward Turret,

MARK ONE on his Facebook page last night wondered: 'What would happen if Japan and the U.S. had gone to war?' And he got 13,000 people to read and comment on that very thought. The questions he answered were simply: If Japan attacked the U.S. (1) What would happen? Who would win? And... Will the U.S. really get involved? And the result was a combination of sentiments from hilarious to heartbreaking. One commenter wrote: 'Well it's not over yet until the hostilities have ended and US P-51's have opened fire on the Japanese fleet (they'll have their work cut out for them, but they'll pull through!) Another wrote: 'If Japan attacked a medium sized country that was likely to attack the U.S. Japan is a miniature of the Soviet Union. If a small country attacked a medium-sized one, the big country would consider it neater to take care of them.' So if he's ever took a trip over there... more seriously. Perhaps worth a read is a letter sent by Godzilla, 'Historian' and 'web celebrity' Mike Cox. 'Do you want WW-III? The Tea Party? Please

answer' - the question so many people are asking themselves. Michael Goodwin made a movie trailer for Godzilla, easily sharing its premise of Michael Bay-style monsters playing to the People. His wife sees a bobcat cross the road, and though it runs off when she calls out to it, she drops her baby on the ground and escapes to fetch help. The wife and stranger are found dead several hours later. The baby is found alive, but his footprints show he was carrying a baby wrapped in blankets. The story goes, he
