## **What's new in Johann Weiss Soundtrack:**

**A gamehunt is the celebration of game playing. It may be performed individually, or as part of a larger cultural festival. Gamehunts appear in a variety of cultures around the world, including China, Japan, Korea, Finland, Germany, Switzerland, and the United Kingdom. In England the activity of hunting for animals for pleasure has long been recognized as a privileged activity of country gentlemen. Early survivals include, in Edward de Vere's Oxford manuscripts, a written-out poem about the gamehunt; descriptions of deer in J. H. Walsh's *The Romance of the Forest*; and references by William Shakespeare (c. 1603-1616) to the hunt and to deer. However, the popularity of deer culling for pleasure and the consequent growth of hunting clubs was a decisive feature of the development of English gentleman sport, culminating in the progressive but selective organization of a European deer-hunting empire in the eighteenth century, which was designated "The British Game." At the root of this whole hunt for the sake of hunting was the royal sport of pheasant hunting; the terminal outcome of the deer hunt was to be a battery of cannon in front of the Tower of London. In writing in the twenty-first century the historian and biographer John Julius Norwich has stated that "next to fox-hunting it is deer-hunting that is closest to a sporting national institution in England. In no other country do so many people participate. ... It is often said that there is no national sport in England. It looks as if a vital exception is deer-hunting, because on that, at least, the English have an institution that is supported by the nation. In this they show surprising definiteness of character, despite the fact that we might not be very keen on killing deer." Although deer-hunting still is an important part of English life today, to the point where the British Game is overseen by a Board of the English Gamekeepers' Association, it is no longer as strictly regulated as it once was: The point of difference is that today, the British Game is no longer taken entirely seriously, and it has been diminished from its pre-eminent position. Country life in England In nineteenth-century England, as late as 1874, the rural population of England "was a very little above the level of the close till after the Reform**

Cosplay Arenas is a simulation of the Arena environment, with your cosplay characters controlled by a brand new AI, written by the creators of NFL Blitz And it's a lot of fun In particular, this game will introduce you to an entirely new way of playing videogames. When the 'skin' of a character is created, a new AI is created (based on the original one). Each AI has its own abilities, personality and, although they'll have the same name, look and clothes as the original. In Cosplay Arenas, the AI can interact with the player by: - Calling for help - Seeing the player - Asking about the player's choices It is also possible to use the AI to switch the player's 'role' in battle. Play it alone, or let your friends take the lead and have them fight together... Unlockable Achievements Kill Your Buddy (3 AP) You must defeat all your friends Friend of the Month (1 AP) Friend of the Month X days and receives a special prize. Community Kill (3 AP) You and a friend have both killed the same enemy. Both of you get 3 AP. You can also ask your AI friends for help or take them off the battlefield. When taking them off the battlefield, you can personalise their costumes and appearance to make them look like you. Clothing: All costumes are fixed and won't evolve as you play, unless you want them to When you play a game, your roles are saved by AI You can select either the 'Cosplay' or the 'Solo' role When you take a break in the game, you can load your existing role to return to the game in the same way You can change the role of the AI for the whole team at any time. This is useful when you want to play as a team, but you want to focus on one individual AI. You can switch the role of one AI at any time (you can have a level of control over more than one at a time). AI: The AI doesn't know the player's name The AI has its own 'character' AI will try to take control of your character If it can't take control, it'll try to win against you. The AI will get into a fight with
