OroTimesheet Crack For Windows is a professional Windows application whose purpose is to help you monitor the time spent on each project by your employees. Plus, it provides a flexible and secure software solution when it comes to managing timesheets, project costs, expenses, budgets, and invoices. The tool also offers access to a web interface, so your employees can enter their timesheets without having to install OroTimesheet on the client computer. Additionally, you may integrate the program with Sage 50 Accounting and QuickBooks software for synchronizing your list of customers or exporting your invoices with a simple click. Prior configuration settings and GUI It embeds a built-in wizard for helping you make some prior configuration settings, and you may add information about your enterprise (name, address, phone number, fax, URL) and insert a logo of your company (JPG file format) that is automatically displayed when printing forms and reports. You are welcomed by a multi-tabbed layout that offers you quick access to several important features of the program, namely Customers, Projects, Activities, Employees, and Invoices. You can make use of the aforementioned modules to keep track of your customers, provide detailed information about your projects, generate used-defined activities, group employees, as well as create invoices. By default, the tool displays the days of the current week in the primary panel, and lets you hide the desired ones, and view info about billing and total cost for each day. The utility comprises plenty of configuration settings, so you need to take some time and experiment with its features if you want to make the most out of this program. Creating a new timesheet OroTimesheet lets you generate a brand-new timesheet by selecting the date, employee, project, and activity, specifying the numbers of hours, inserting custom notes, embedding user-defined fields, setting up the overtime parameters, entering the cost and billing, as well as managing expenses. Comprehensive reports and other handy features The app lets you work with a wide range of reports (e.g. Time, Costs, Billing, Expense, Time banks, Punch clock) and make use of the built-in report generator for customizing the existing reports or creating new ones. What's more, you can make a detailed search operation throughout the timesheets, export data to an Excel, Access or dBase file, maintain a time bank for each of your employees working overtime, and

An all-in-one app that lets you create and save macros for Word, Excel, Access, Outlook, Windows batch file and MySQL. Now available in 64-bit for even faster performance. What's New in the OroTimesheet?

Zoho Invoice is a cloud-based invoicing solution that gives you one-click access to all your invoices, track payments, send reminders, create custom invoices, and manage discounts. You can also get access to a suite of custom reports, allowing you to analyze your account activity. Key features You can set up your invoices from one location, create free templates to save time, and send them to your clients in different formats. Moreover, you can track payments and ask for refunds. Apart from tracking payments and managing refunds, you can provide detailed reports to your clients, and request a quote without leaving your invoices. With its custom reports, you can analyze your clients' payment history, analyze the performance of your sales representatives and their expenses, and keep track of your clients' historical spending habits. What's more, you can get detailed information regarding your most recent transactions, track your clients' due dates, make adjustments, and create invoices with customized details. Flexible integration with various accounting software Since you can link your invoices with your accounts in QuickBooks, Sage, Xero, Zoho, FreshBooks, and Xero, you can synchronize all your data in

one place. Plus, the invoicing solution lets you integrate the program with invoicing solutions like FreshBooks, Xero, and QuickBooks. Prior configuration settings You may opt to set up the application from scratch or take the following steps to make the most out of this solution. Prior configuration settings:

- Provide your company name, phone number, address, and other important information.
- Edit the company logo of your company (a JPG file must be uploaded).
- Select a payment method for invoices.
- Upload a local timesheet.
- Select a payment method for timesheets.
- Upload an account or go to the section “Set Up your Accounting Software” in the main menu.

Maintaining customer information You can track customer information, and even synchronize data with your accounting software.

- Give your clients a name, email address, and phone number.
- Upload their account details in an account.
- Synchronize the account with your accounting software.
- You may link the account to a local timesheet.
- You may synchronize the account with your accounting software.

Creating an invoice The solution provides easy-to-use invoice forms and allows you to make changes in real-time.

- Provide your company name and address.
- Enter the item, description, price, and quantity of the items.
-
