We take a look at the proposed rebuilding of the trackside at Donington Park – the major meeting point for both the Le Mans 24 Hours and World Superbikes – for the 2019 British Grand Prix. It's been announced that the 2019 British Grand Prix will take place at Donington Park, between 3rd and 7th July, and the surrounding area is set to undergo a major upgrade as part of the GP's preparations for the race. The centre of the circuit, where the main straight meets the pit straight, has already undergone significant work, which will see a brand new pit and paddock area built, a new bridge constructed across the valley and new access roads and services built from the circuit's current access points. However, the trackside itself will also see a significant amount of work carried out, with access

points from the grandstand and paddock area moving away from the circuit, while the trackside barriers are being changed from a textured, steel roll, to a more traditional crash-proof metal rail, as is used at the majority of European circuits. The paddock area has already seen a number of changes made ahead of the September's Eurobike show, with new gantries and fencing replacing the temporary stand structures that currently sit between the current paddock access and the paddock itself. As you can see in the photo above, the new 'donut' trackside gantry has already been installed at the top of the existing grandstand, while the trackside is due to be brought up to racing specification by mid-October. The project is a significant one, as it will see the addition of 1,000m<sup>2</sup> of new parking, a multi-storey
