However, there are usually more than two points of color and the foreground and background are blended and expanded into one area. The five modes in Photoshop's Magic Wand tool are useful for more refined selections. The **Magic Wand** tool in each of the five selection modes has a slightly different selection criteria. This lets photographers create more of the selections they want, and more efficiently. Photoshop's lasso tool is tightly integrated with this all-encompassing tool. By using the **Move Tool (V)**, you can change the size of the selection area and then set the **Feather** option when you drag the tool around. This setting helps to blend the selected areas.
