“Adobe continues to innovate for both users and businesses everywhere. Photographer Tanya Klein learned how to use Photoshop on iOS for photo editing, and she shares how to stay productive and super creative in her new book, *Photoshop - The Workhorse*. I love how my editing workflow is even better on iOS,” explains Klein. “By delivering content to the largest installed base of smartphones and tablets, we’re actively disrupting the way people consume all of their images,” said David Wadhvani, Adobe’s chief product officer. “The Photoshop mobile app makes it even easier than ever for anyone to enjoy what can be a powerful and time-consuming process from a mobile device.” Starting today, the new workflows in Photoshop for iOS and Android will let users share files for review online in the Creative Cloud desktop app. Collaborating on projects in the same Place means people don’t have to leave Photoshop to find out how they are doing, and all of their images are instantly accessible at any time, on any device. Collaborators can capture attention and get feedback online in real time, and while they continue working on their own designs.
